

Email FootPrinting

We'll learn how to gather information about an email address and can track it.

First open any mail and goto “Show original”

Then Copy to clipboard.

Then goto ip2location email tracer.

The screenshot shows a Kali Linux virtual machine environment. The primary window is a web browser displaying the IP2Location Free Email Header Tracer website. The browser's address bar shows the URL <https://www.ip2location.com/free/email-tracer>. The website has a dark header with navigation links: Home, Solutions, Products, Pricing, Resources, and a Log In button. A sidebar on the left contains a list of applications, with 'Email Tracer' highlighted in blue. The main content area is titled 'Email Header Tracer' and includes a description of the service. A search box contains the email header text: `<Giv [redacted]@ip2location.com> From: How are you brother?<Giv [redacted]>`. Below the search box is a blue 'LOOKUP' button. At the bottom of the browser window, a cookie consent banner is visible. The taskbar at the very bottom of the image shows various application icons, including the Windows Start button, Search, and several open applications like Firefox, Chrome, and VS Code.

The screenshot shows the IP2Location website interface. At the top, there's a navigation bar with links like Home, Solutions, Products, Pricing, Resources, and a Log In button. Below the navigation bar, there's a search bar with the text "IP Address Map" and a "LOOKUP" button. The main content area displays the IP address "209.85.220.41" and its corresponding location data:

IP Address	209.85.220.41
Country	United States of America
